## AV-TEKK NEW AND NEW HD

Available in many High Volume applications

- High efficiency and durable Cooler Designs
- Heavy Duty Bar & Plate options along with OE Style Tube & Fin designs
- Industry Leading Charge-Air Coolers.
- Seven-Year Warranty - Unlimited Miles (Bar & Plate)  
Two-Year Warranty (Tube & Fin)

## HOSE & CLAMP KITS

- Order corresponding kit part number to get everything you need to replace ALL hosing for the charge-air cooler.
- Both hoses contained in Kits are hot side compatible.

## QUICK CHECK LEAK TEST KITS

- No other special tools needed
- Quickest and easiest connections available
- Simulates a constant air load for accurate diagnostics
- Fits most charge air cooler connection types
- Relief valve and restraints for safety
- Includes compact carrying case

## GRIZZLY AIR EGR COOLERS AND OIL COOLERS

Available in many High Volume applications

- Improved designs to help eliminate common issues related to EGR and Oil coolers
- Superior quality when compared to other remanufactured units in the market today
- 12 month - Unlimited Mileage Warranty on most products  
Lifetime Warranty - Unlimited Mileage Warranty on products where designated
- Available for Ford – Dodge – GMC – Chevrolet – International - Mercedes Benz and Cummins Engines

## GET TO KNOW YOUR CHARGE-AIR COOLER

Today, charge-air coolers are used on virtually every heavy-duty truck. They are essential to meet engine manufacturers' design objectives for horsepower, fuel economy, and exhaust emissions.

The trend toward smaller sized engines producing higher horsepower places increased stress on critical performance components such as turbochargers and charge-air coolers. Boost pressures have driven cooler inlet temperatures from around 325°F during the 70's and 80's, to over 400°F in later model engines.

A typical cooler operating with slightly over 400°F inlet temperature will drop the boosted air's temperature to just over 100°F before it enters the engine. This drop of nearly 300°F causes extreme thermal stresses from expansion and contraction of the entire structure. These stresses along with engine load variances and chassis vibrations cause frequent fatigue failures, the majority being cracked header plates and air tubes (see image below).

Understanding Your Service Options:		
<b>“FIX AND GO”</b>	<b>“REPLACE &amp; REWELD”</b>	<b>“Av-Tekk NEW &amp; NEW HD”</b>
Putty type fix at a radiator repair shop is not durable and often leads to wasted time and money. It does not strengthen weak areas that will eventually fail when placed back in service.	Complete replacement of the center section or “brick” is good but very expensive and is subject to the quality of the replacement brick	Av-Tekk’s New and New HD units require no core and both offer superior quality and performance. These completely new replacement coolers are available in several high volume applications.
<b>LOW COST/LOW QUALITY</b>	<b>HIGH COST/HIGH QUALITY</b>	<b>LOW COST/HIGH QUALITY</b>
NOT COMMERCIALY ACCEPTABLE!	OK SOLUTION!	BEST SOLUTION!

## SAVING MONEY WITH AV-TEKK

The Av-Tekk brand means Av-Tekk solutions. Our brand has been revolutionizing the charge-air cooler industry since the very beginning. We have made it our mission to improve the durability and experience of all diesel charge-air coolers. From the introduction of the only FAA approved rebuild process for charge-air coolers, to our amazing heavy duty bar and plate designs, Av-Tekk is constantly working to improve our brand through the quality of products we provide. Even now when the industry is asking more of its diesel charge-air coolers, Av-Tekk's products stand above the rest.

Our “Heavy-Duty” bar and plate construction, denoted by “HD” on the part number suffix, is the most rugged and durable type of construction and is backed by our 7-year/unlimited mileage warranty. The “HD” coolers are available on most popular applications where experience has shown they are needed.

- Industry’s Best Charge-Air Coolers
- Nation Leading Warranty
- Broadest Service Network
- Priced Right for Highest Value

*Example of Av-Tekk's Heavy Duty Bar & Plate Construction Design*

*Example of Tube & Fin construction using a header plate, typical of most OEM designs.*

Av-Tekk's HD design uses a series of heavy bars and plates to form a stronger cooler and eliminate the header plate and the fragile air tubes permitting the manifolds to be welded directly to the bars in the construction process.

*Industry studies have shown header plate thermal fatigue failures and air tube leaks account for the majority of charge-air cooler failures.*

Are you testing coolers to see if they are leaking beyond O.E.M. specifications?

## QUICK CHECK ADVANTAGES

- No other special tools needed
- Quickest and easiest connections available
- Simulates a constant air load for accurate diagnostics
- Fits most charge air cooler connection types
- Relief valve and restraints for safety
- Includes compact carrying case

THIS COMPLETE KIT COMES WITH ALL ADAPTERS AND FITTINGS TO TEST ALL TRUCK SIZES, PICKUPS THRU CLASS 8 TRACTORS.

ORDER PART NUMBER A351CAS

## FOR MORE ON QUICK CHECK LEAK TEST KIT GO ONLINE TO: [WWW.AV-TEKK.COM](http://WWW.AV-TEKK.COM)

Av-Tekk's new Test Kit may be used to test the pressure drop of most known sizes of charge-air coolers (CAC).

According to most O.E. Manufacturer's Specifications, charge-air coolers that show a static pressure drop greater than 5 PSI in a 15 second test, beginning at 30 PSI, should be replaced. Av-Tekk's new CAC Test Kit provides tools for you to safely determine whether any CAC passes or fails the manufacturer's test.

### IMPORTANT!

#### USING HIGH AIR PRESSURES AND LARGE TEST PLUGS MAY PRODUCE DANGEROUS RESULTS!

*Please read the warnings supplied with the test kit before following these instructions.*

The test plugs in this set are heavier duty than most. Notice that each has a thicker washer to prevent cupping when you tighten the test plugs in the opening. They also have 4" long cast handles that permit you to tighten them more easily.

Inspect the inside of the opening and the test plug rubber, to make sure both of these surfaces are clean and dry. Test plugs should be installed flush with the opening and tightened firmly by hand. Install the Test Plug Clamp, positioning it over the handle so the notched portion of the

clamp engages the outside of the inlet/outlet just behind the bead. Hand tighten the long wing bolts equally, and check again to make sure that the notched portion of the clamp is engaged behind the bead at four points. Hand tighten the wing bolts until snug or use an open-end wrench to tighten. Do not over tighten!

*If the cooler has been removed from the vehicle, position it so the open stem is pointing up.* Next, connect the brass tester at the quick disconnect side. This tester is equipped with a pop-off safety valve that has been preset to 35 lbs maximum pressure. **DO NOT CHANGE THIS SETTING OR TAMPER WITH THIS DEVICE IN ANY MANNER.**

Keep this safety valve clean and dry. Check it occasionally to make sure that it releases pressure at the 35 lbs setting. Replacement safety valves and other parts are available if ever needed.

After checking to make sure everything is properly secured, introduce air through the air stem using a common tire chuck. Increase the air pressure to precisely 30 PSI and then measure the pressure drop, if any, for a period of 15 seconds.

As soon as you have finished testing the charge-air cooler, return all parts of this set to the plastic case provided, and close it to keep them clean and dry for their next use.

# hose & clamp kits <sup>TM</sup>

These complete kits have both hoses and clamps to replace ALL hosing from charge-air cooler inlet and outlet.

Both hoses contained in the Av-Tekk Hose and Clamp Kits are hot side compatible.

**Now order one part number to get everything you need to replace ALL hosing for the charge-air cooler.**

To determine corresponding Hose and Clamp kit for your cooler, see dimensional drawing section of this catalog.

## EGR COOLERS

OEM

GRIZZLY AIR

Proper coolant flow is essential to all vehicles operations. When coolant flow is inhibited for any reason failure of crucial engine components can occur from extreme overheating. To help eliminate the failures of some common components due to overheating Av-Tekk is introducing its new line of products Grizzly Air. Most in the diesel service industry know how common it is to replace EGR coolers and oil coolers multiple times throughout the use of a vehicles life. Destined to fail because of poor designs these components just aren't made to last. Av-Tekk's Grizzly Air seeks to solve this problem by providing a new robust rebuild process for EGR coolers that eliminates the cause of failures in this component. Utilizing T304 stainless steel tubing, Grizzly Air eliminates the Turbulator design used in most OEM EGR coolers. Then, this new stainless steel tubing is TIG welded to precise cut plates attached to the cooler housing. This new design from Grizzly Air ensures that the EGR cooler will continue to operate properly even when the flow of coolant has been inhibited. Just like Av-Tekk Heavy Duty Charge-Air Coolers, the Grizzly Air product line offers superior quality for any situation.

Whether it's a personal vehicle or a work vehicle, from light duty to heavy duty engines Grizzly Air offers a wide range of EGR and Oil Cooling products.

Grizzly Air provides a Limited Lifetime Warranty on Ford 6.0L Powerstroke applications (Parts GA 301 and GA 304, upgrade option available for Mercedes Part GA 501), and a 12 Month/Unlimited Mileage warranty on all other products. Call any Av-Tekk representative for more.

Available for Ford – Dodge – GMC – Chevrolet – International - Mercedes Benz - Cummins

GRIZZLY-AIR

FOR FORD 6.0L POWERSTROKE ENGINES

### **SOLVE YOUR EGR COOLER WOES.**

OE style EGR coolers are destined to fail from poor design. Upgrade today to a Grizzly Air EGR cooler for your Ford 6.0L Powerstroke Engine from Av-Tekk and solve your problems now. Featuring a new robust rebuild process for EGR coolers, Grizzly Air helps to eliminate the cause of failures in this component. Utilizing T304 stainless steel tubing, Grizzly Air eliminates the Turbulator design used in most OEM EGR coolers. Then, this new stainless steel tubing is TIG welded to precise cut plates attached to the cooler housing. This new design from Grizzly Air ensures that the EGR cooler will continue to operate properly even when the flow of coolant has been inhibited.

**ASK YOUR SALES PERSON ABOUT UPGRADING TODAY.**

**JUST MENTION GRIZZLY AIR.  
REFERENCE PART NUMBERS GA 301 FOR  
THE ROUND STYLE AND GA 304 FOR THE  
SQUARE STYLE.**

### **LIMITED LIFETIME WARRANTY**

THE LIMITED LIFETIME WARRANTY IS OFFERED ONLY ON PRODUCTS FOR THE FORD 6.0L POWERSTROKE ENGINES

ARE YOU TESTING COOLERS  
TO SEE IF THEY ARE  
LEAKING BEYOND  
O.E.M. SPECIFICATIONS?

*Industry Fact: In a survey of over 200 OEM dealerships, service managers throughout the US and Canada came to the consensus that over 50% of trucks over 5 years old have coolers with leakage that exceeds O.E. specifications. That means wasted fuel and engine performance!*

There is no better time than now to test charge-air coolers as many fleets have increased their trade cycles. Av-Tekk's Quick Check Leak Test Kit makes testing a charge-air cooler easier than ever, and you don't even have to remove it from the vehicle. What are some other Quick Check advantages? Log on to [www.AvTekk.com](http://www.AvTekk.com) for more details about this and other products that bare the Av-Tekk brand.

ONE KIT TESTS ALL SIZES OF COOLERS.
