Remanufactured C7 Injectors

Program Highlights

Delphi remanufactured C7 injectors include a new, unique trim code specifically engineered to ensure accurate fuel delivery, while maintaining power and efficiency.

All injectors are fully disassembled; each component is then thoroughly cleaned and inspected. Parts that do not meet Delphi quality standards are scrapped and replaced with new.

Full support:

- ▶ 12 month, unlimited-mileage warranty
- ▶ 90 day, no-hassle warranty
- ▶ R & R on qualifying Delphi remanufactured injector warranty claims
- ▶ Over 30 years of technical expertise available through our toll-free technical hotline

Features	Benefits
New, unique trim code	Provides optimum performance and increased fuel efficiency while reducing emissions
100% Surface lapping of critical components	Ensures pressure sealing of sub-assemblies
100% O-ring replacement	Proper sealing

The Delphi Advantage

Delphi continues to bring added value to your business by extending our All Makes product offerings with new Caterpillar engine applications. The C7 engine series is one of the most popular engine platforms in the market today.

Unit Injectors are our core expertise. Delphi brings more than 25 years of EUI design experience, which is why we are the world's leading EUI supplier.

Delphi utilizes its OE engineering capabilities to ensure that each injector is remanufactured with a unique trim code to deliver the quality that you have come to expect from Delphi.

Delphi uses the same OE expertise and stringent standards for remanufactured parts as it does for its OE applications.

Delphi remanufactured parts are produced in an ISO 9001:2008 and ISO 14001:2014 certified facility.

Did You Know?

To ensure proper engine performance, the new unique trim code provided must be entered into the ECM.

The trim code eliminates any variation in injector performance due to small differences in manufacturing tolerances, friction between components and fuel flow.
