**Customer Service & Diesel Technical Hotline**

1.800.521.4784  
dieselsales@delphi.com  
Monday through Friday  
8:30 a.m. - 5:00 p.m. ET

Available from:
**Program Highlights**

Delphi uses the same OE expertise and stringent standards for remanufactured parts as it does for parts on new vehicles. Delphi reman parts are produced in an ISO 9001:2008 and ISO 14001:2014 certified facility with a clean room that ensures impeccable quality control.

Delphi’s reman center is staffed with highly trained technicians and engineers that use exclusive testing methods and equipment to simulate “live” engine performance.

**Full support:**

- 12 month, unlimited-mileage warranty
- 90 day, no-hassle warranty
- R & R on qualifying Delphi remanufactured injector warranty claims
- Over 30 years of technical expertise available through our toll-free technical hotline

**The Delphi Advantage**

- All injectors are fully disassembled; each component is then thoroughly cleaned and inspected.
- Parts that do not meet Delphi inspection standards are scrapped and replaced with new.
- All match ground components are gauged to ensure proper clearance.
- Delphi functionally tests 100% of its remanufactured product to ensure the highest quality.
- Nozzles are 100% flow tested to ensure proper fuel delivery.
- 100% of all nozzle assemblies are fitted with new springs, shims, and stops and tested to ensure the NOP and needle lift meet Delphi specifications.
- All units are date coded for traceability purposes per our ISO specifications.

**Did You Know?**

Reducing the level of emissions is critical in today’s diesel engines. Delphi is leading this technological revolution with its advanced fuel injection systems.

The leading causes of injector failure include:

- Poor Fuel Filtration
- Fuel Contamination
- Incorrect Installation

It is good practice to confirm the root cause of the failure before installing replacement injectors.
